Review

The review system is used for administering the users comments of the hotel. Why do we need to admin this?? Its because the clients have 3 possible “type” of comments that the can do:

- The normal comment: That its a positive or negative comment that its ok to show to the public
- The hidden comments: Are the ones that uses bad words and can not be showed to the public because can damage the image of the hotel
- The not_apropiated: These comments are the ones that we don't want to show to the customer because they are too bad to be shown instead of using bad words.

This are the comments that we have in our data base.
